

## Import Users

One of the first tasks to complete is adding students and teachers to your account. Students and teachers must be added separately. The following sections will walk you through adding each type of user.

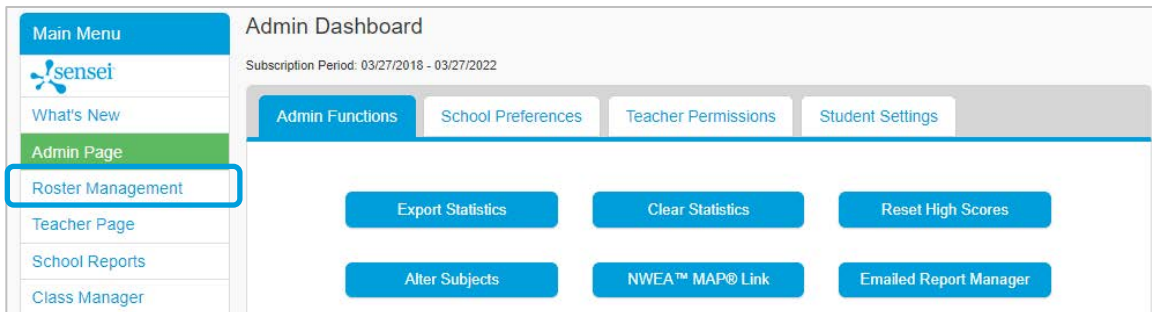

[Batch Import Students](#), page 4

## Batch Import Teachers

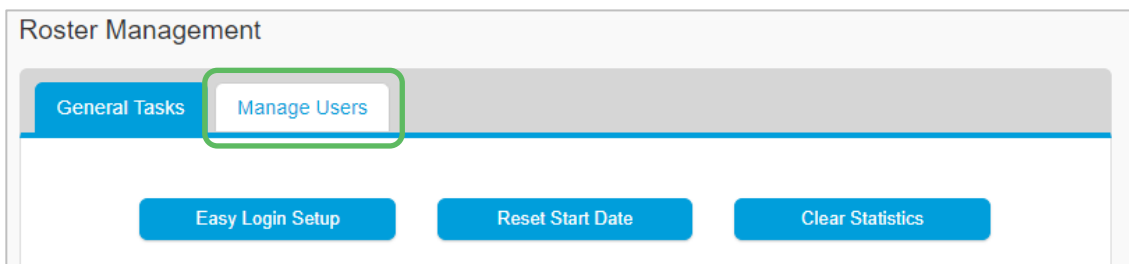

The most efficient way to upload users is to batch upload from an Excel spreadsheet or comma delimited text file. Prepare your upload file ahead of time. In Step 5, you will have the opportunity to compare your file to a sample file. Correct any issues with you file at that time.

Feature Update July 15, 2018: You can now automatically email teachers their login credentials by adding their email addresses in the import file. See the note on Step 6.

1. In the Main Menu, click **Roster Management**.

2. Click the **Manage Users** tab.

3. Click **Import a List of Users**.

4. Read the **Before You Start** tips to ensure your file is ready for the upload process.
5. Under **Select Upload Type**, click **Teachers**.

**Before You Start**

- Microsoft Excel and comma delimited text files are supported.
- Students and teachers must be in separate files.
- Do not include formatting such as borders or hidden columns and/or blank cells within your data range.
- When uploading Microsoft Excel files, please put all data in the first sheet of the document.
- Do not put more than 15,000 records in a single file.

---

Select Upload Type:

Students
  Teachers
 [Download Student Sample File](#)

Select Database File:

[Browse](#)

Does row 1 contain column headers which you would like to ignore?

Yes

[Privacy Policy](#)

6. Download the **Teacher Sample File**. Compare your file to the sample file to ensure a successful upload.

Note: Include each teacher's email address in the upload file. An email will be sent to each teacher with their login credentials once the upload is complete. Below is an example file.

	A	B	C	D	E	F	G
1	SIS Primary Key	Last Name	First Name	email	Username	Password	Grade
2	12345	Smith	Abby	<a href="mailto:asmith@studyisland.com">asmith@studyisland.com</a>	asmith	1234	5
3	12345	Smith	Barbara	<a href="mailto:bsmith@studyisland.com">bsmith@studyisland.com</a>	bsmith	1234	6
4	12345	Smith	Carrie	<a href="mailto:csmith@studyisland.com">csmith@studyisland.com</a>	csmith	1234	7
5	12345	Smith	Dan	<a href="mailto:dsmith@studyisland.com">dsmith@studyisland.com</a>	dsmith	1234	5
6	12345	Smith	Evan	<a href="mailto:esmith@studyisland.com">esmith@studyisland.com</a>	esmith	1234	6

For Steps 8 – 10, you will be mapping, or assigning, import file fields to the appropriate information, so your users will upload properly into Study Island. Review each field and make sure the information matches your import file.

8. On the next page, under **User Info**, change the User Type to **Teacher**.

The screenshot shows the 'User Information' configuration page. At the top, there are tabs for '1. User Info', '2. Usernames/Passwords/Email', '3. Optional Fields', '4. Special Fields', '5. Class Owners', and '6. Register Users'. Below the tabs, there is a 'User Information' section with a header: 'Headers: SIS PRIMARY KEY, LAST NAME, FIRST NAME, EMAIL, USERNAME, PASSWORD, GRADE'. There are two columns of dropdown menus. The left column has 'First Name' (FIRST NAME), 'Last Name' (LAST NAME), 'Grade' (GRADE), and 'User Type' (Teacher). The right column has 'Full Name' (empty), 'Grade' (GRADE), and 'User Type' (Teacher). The 'User Type' dropdown in the left column is highlighted with a green box. At the bottom, there are 'Cancel Import' and 'Next Section' buttons.

9. On the **Usernames/Passwords** tab, choose the username and password defaults for your school. It is recommended to select **Yes** for the option **Require users to change password upon first login**.

By default, the system emails each teacher their login credentials, if emails are present in the file.

The screenshot shows the 'Username Decisions' and 'Password Decisions' configuration pages. The 'Username Decisions' section has a 'Username' dropdown (USERNAME) and an 'Auto-Generation Method' dropdown. The 'Password Decisions' section has a 'Password' dropdown (PASSWORD) and two radio button options: 'Require users to change password upon first login' (selected) and 'Keep existing password for existing users (SIS Primary Key required)'. The 'Email Decisions' section is highlighted with a blue box and has an 'Email' dropdown (EMAIL) and a checked radio button option: 'Email login information to teachers who have not previously logged in'. At the bottom, there are 'Previous Section', 'Cancel Import', and 'Next Section' buttons.

10. Check the other available tabs to make sure all fields are mapped correctly.
11. Click **Register Users**. It may take a few minutes for the import preview to load.

The screenshot shows the top navigation tabs: '1. User Info', '2. Usernames/Passwords/Email', '3. Optional Fields', '4. Special Fields', '5. Class Owners', and '6. Register Users'. The '6. Register Users' tab is highlighted with a blue box.

- Review the import preview. Yellow highlights indicate a conflict with an existing username. A number is automatically appended to make the username unique. If any mapped fields are missing, users will not be uploaded. Correct any mapping errors on the other tabs and click **Register Users** again.

Import Preview and Summary

There are (2) users which will be created as new users as a result of this import.  
The yellow highlights indicate a conflict with an existing username. These users will have a number appended to their username to make it unique.

**Finalize Import**

Users to Create (2) | Users to Update (0) | Users with Errors (0) | Ignored Users (0) | Users to Deactivate (0)

Row	First Name	Last Name	Username	Password	Email	Grade	User Type	School
1	Abby	Smith	absmith1	1234	in.ProductSupport@edmentum.com	Teacher	Teacher	EDMENTUM UX DEV TRIAL SCHOOL (TX)
2	Barbara	Smith	bsmith	1234	sarah.bosak@edmentum.com	Teacher	Teacher	EDMENTUM UX DEV TRIAL SCHOOL (TX)

**Previous Section** **Cancel Import**

- When you are ready, click **Finalize Report**. When complete, the Import Results Summary appears.

Import Results Summary

2 users were created. 0 users were updated. 0 were deactivated.

Modified Usernames

The following usernames were modified from what you originally requested:

absmith was changed to absmith1.

**All Finished**

## Batch Import Students

The most efficient way to upload users is to batch upload from an Excel spreadsheet or comma delimited text file. Prepare your upload file ahead of time. In Step 5, you will have the opportunity to compare your file to a sample file. Correct any issues with you file at that time.

Feature Update July 15, 2018: You can now include parent contact information in the student import file. Include up to four parent contacts. See the note on Step 6.

- In the Main Menu, click **Roster Management**.

Admin Dashboard

Subscription Period: 03/27/2018 - 03/27/2022

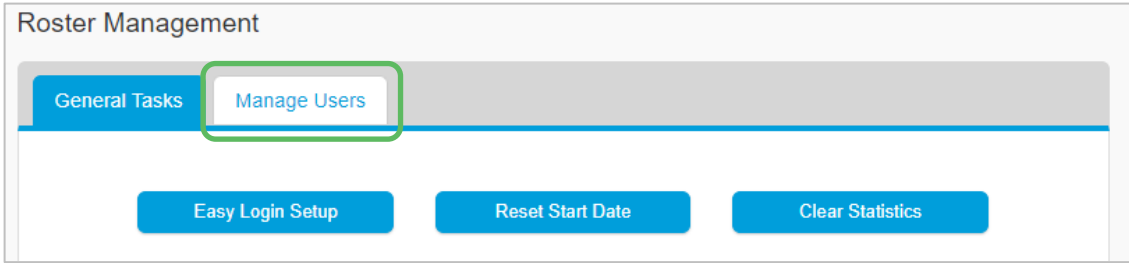

Admin Functions | School Preferences | Teacher Permissions | Student Settings

Export Statistics | Clear Statistics | Reset High Scores

Alter Subjects | NWEA™ MAP® Link | Emailed Report Manager

2. Click the **Manage Users** tab.

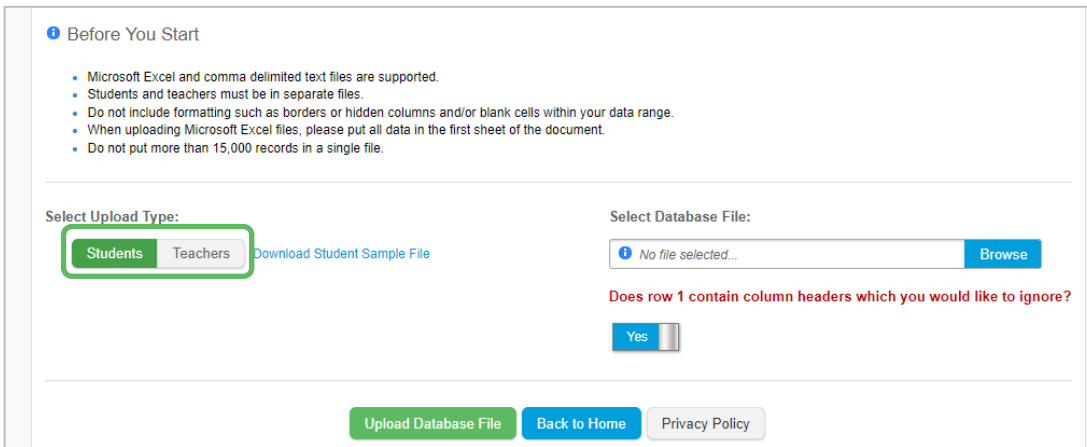

3. Click **Import a List of Users**.

4. Read the **Before You Start** tips to ensure your file is ready for the upload process.

5. Under **Select Upload Type**, **Students** should be selected by default.

6. Download the **Student Sample File**. Compare your file to the sample file to ensure a successful upload.

Note: Include parent information and email to simplify teacher – parent communication. If your rostering system assigns parents an identification code, include the code in the **Parent ID** field. This ensures parent information is retained from one upload to the next. If you leave the field blank, the system will automatically assign an ID to each parent.

SIS	Primar	FirstName	LastName	Grade	Username	Password	Grade	Ethnicity	Gender	Econ. Dis.	Title I	Migrator	Special	Gifted	Parent 1 ID	Parent 1 First Name	Parent 1 Last Name	Parent 1 Email	Parent 1 Type	Parent 2 ID
123455	Elvia	Hellman	4			1234														
123456	Kathy	Gabalton	4			1234														
123457	Cheyenne	Benedetti	4			1234														
123458	Carey	Eldred	4			1234														

- When your file is ready, click **Browse** and select the file. Then click **Upload Database File**.

Select Upload Type: **Students** Teachers [Download Student Sample File](#)

Select Database File:  [Change](#)

Yes

[Upload Database File](#) [Back to Home](#) [Privacy Policy](#)

For Steps 8 – 10, you will be mapping, or assigning, import file fields to the appropriate information, so your users will upload into Study Island. Review each field and make sure the information matches you import file.

- On the next page, under **User Info**, change the User Type to **Student**.

1. User Info 2. Usernames/Passwords/Email 3. Optional Fields 4. Special Fields 5. Class Owners 6. Register Users

User Information

Headers: FIRSTNAME, LASTNAME, GRADE, USERNAME, PASSWORD

First Name: FIRSTNAME OR Full Name: -

Last Name: LASTNAME OR Grade: GRADE

Grade: GRADE OR User Type: Student

User Type: **Student**

- On the **Usernames/Passwords** tab, choose the username and password defaults for your school. It is recommended to select **Yes** for the option **Require users to change password upon first login**.

1. User Info 2. Usernames/Passwords/Email 3. Optional Fields 4. Special Fields 5. Class Owners 6. Register Users

Username Decisions

Username: USERNAME

Auto-Generation Method: (Doe Suffix)

Optional: Using the Auto-Generation method will override the column you selected for Username. If you are using an auto-generated username, the "Suffix" portion of the username will be replaced with the value you enter below. (ie: joeUser@YourSuffix, joeUser-YourSuffix) If you are using username values from the file you are importing, the suffix entered below will be appended to your value. (ie: joeUser@YourSuffix) (Suggestion: Use an acronym for your school. NO SPACES)

Username Suffix: EPS

Password Decisions

Password: PASSWORD

No Require users to change password upon first login.

No Keep existing password for existing users (IS Primary Key required).

Email Decisions

Email: -
